

**2019 River Watch Forum Assignment**  
**Data Driven Watershed Problem Solving**

School: \_\_\_\_\_

Towns in school district: \_\_\_\_\_

Local Rivers, Streams & Watershed(s):

---

---

---

What datasets would help you find an issue or problem in your watershed?

---

---

---

What types of issues or problems exist in a watershed?

---

---

---

List three different types of issues or problems in your watershed:

(Example: Financial)

---

---

---

List agencies/organizations/groups relevant to your project idea:

---

---

---

**Who** are we?

**What** problem are we going to solve?

**What** resources are needed to solve this problem?

**Where** does the problem exist?

**Why** are we trying to solve this problem?

**What** platforms will we use to present our ideas?

**How** will this benefit our watershed?
