

WATERSHED EDUCATION PLAN

How much do you really know about watersheds? Do you know what watershed you currently reside in? Do you know how you're affected by your watershed? These are all questions you would know if you took part in our watershed education plan.

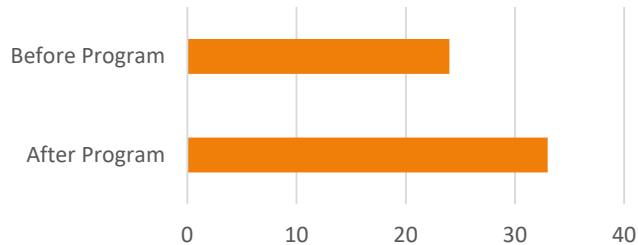

To prove our hypothesis that our education plan would teach others about watersheds, we decided to put it into action by presenting to our local third grade class. We started off the program with a kahoot to test the initial understanding that we were working with. Then, we followed that with a PowerPoint presentation and a board game based on watershed trivia. After we had finished all the activities, we then had the students take another kahoot quiz to test end results.

All the test scores were boosted drastically. With this newly found data, we feel that we have proven our education plan to be successful.

INNOVATIVE WATERSHED EDUCATION

Top 5 Scores Before and After Teaching About Watersheds

FISHER RIVER WATCH TEAM:

(FROM LEFT TO RIGHT) HAYDEN REITMEIER, LOGAN BERGQUIST, LINDSEY KURZ, JONAS DUTRON, VALTERS VASERMANIS, KELBY CLAUSON AND HALLE REITMEIER *NOT PICTURED*
