2024 River Watch Forum

Campbell-Tintah, Bois de Sioux Watershed, February 28th, 2024

Team/Watershed Overview

Campbell-Tintah joined River Watch in 2003. That means that this is the 21st year we have been in River Watch. The advisors of the team oversee the project, but the team members are the ones who make the project.

Team Members:
Advisors: Mr. Mayeda and Ms. Serino
11th Grade: Spencer Murdoff, Brody Steenblock, and Jackson Steffens
10th Grade: Keira Kania and Tyler Lancaster
9th Grade: Carter Gerou, Gavin Heifort, Austin Jonason,
Keegan McGuire, Cobin Raguse, Tucker Steffens, and Owen Wood
7th Grade: Mikenlee Hehn, Zaina Morgan, Matthew Weidner, and
Josiah Wiertzema

The team all worked on different parts of the project because of the size of our River Watch team. We had to overcome a big challenge because in the middle of the year our team leader transferred schools. It was hard on the team, but we worked through it as a team.

River Watch Calendar

The calendar was from June 2024-June 2025. It has holidays and our future River Watch activities.
Lots of scenery photos taken on our sampling trips.
Photos were taken by Jackson Steffens, Owen Wood, and Mr. Mayeda
The Calendar was done by Jackson Steffens

Sampling Binder

The sampling Binder has lots of information on our sampling sites. It shows where are sites our and how to get to them. We got the information from river.watch
The sampling binder was done by Owen Wood, Tucker Steffens, and Austin Joanason.

Podcast

Topic: how the Bois de Sioux watershed flows and its tributaries
Explain recording process: The podcast was recorded on a SAMSON Meteor Microphone, and edited in Audacity V. 3.3.3

The podcast was done by Spencer Murdoff

Plans for 2024/Assignment Feedback/Other

This coming year we would like to bring back snow trails. We are going to go on some kayaking trips as a team. We are going to try to get new River Watch members by showing the upcoming kids what we do and how much fun it is.

Support and funding provided by:
Support for the **River Watch Program** is provided by the Red River Watershed Management Board, Minnesota Clean Water Fund, Minnesota Pollution Control Agency, Red River Joint Water Resource District, North Dakota Department of Environmental Quality.
